linkedin.com/in/akrambhat — github.com/akrambhat — akrambhat.github.io

PROFESSIONAL PROFILE

Information Science and Engineering graduate with hands-on experience in applied AI/ML, NLP, Python development, and software engineering. Built independent projects involving semantic embeddings, LLM-based analysis, browser automation, and client-server systems. Experienced with pretrained transformer models, vector similarity, REST APIs, Linux, and Git. Completed AWS Educate coursework in Cloud 101 and Machine Learning. Seeking an entry-level AI/ML Engineer role focused on applying machine learning and AI to practical software systems.

EDUCATION

Cambridge Institute of Technology, Bangalore

Bachelor of Engineering in Information Science & Engineering

June 2026

CGPA: **7.91/10**

Kashmir Government Polytechnic College, Srinagar

Three-Year Diploma in Information Technology

June 2023

Percentage: **78.8%**

EXPERIENCE

Android Developer Intern — MindMatrix

Feb 2026 – May 2026

- Contributed to development of **Namma Raste**, a civic reporting Android application, as part of a team using Kotlin and Jetpack Compose.
- Implemented the **CameraX** component for capturing images used in civic issue reporting.
- Contributed to application development and refinement through debugging, testing, and Git-based collaboration.
- Worked with Generative AI tools for code generation, debugging, UI development, and rapid feature implementation.
- Contributed to the version of the application shipped at the conclusion of the internship.

AI/ML & SOFTWARE PROJECTS

TabMind — Semantic Browser Tab Clustering

Python, Sentence Transformers, NumPy, JavaScript, Chrome Extensions, HTTP, Client-Server Architecture

GitHub Repository

- Built a functional Chrome extension that automatically organizes browser tabs into semantically related groups using NLP-based embeddings.
- Integrated the pretrained **all-MiniLM-L6-v2** Sentence Transformer to convert tab titles and URLs into semantic vector representations.
- Implemented **cosine similarity** and centroid-based grouping to determine relationships between browser tabs.
- Developed a Python HTTP server to receive tab metadata from the Chrome extension and return clustering results.
- Implemented dynamic group assignment and centroid updates as new tabs are processed.
- Designed the system as an ongoing project, with the current release providing the core end-to-end semantic clustering functionality.

EntrySense — AI-Powered Job Discovery & Analysis

Python, LLMs, OpenRouter, Web Crawling, SQLite, HTML Parsing

GitHub Repository

- Independently built an AI-assisted job discovery and analysis system from end to end.
- Developed crawlers for multiple ATS platforms to discover and collect job postings.
- Implemented keyword-based filtering to identify potentially relevant opportunities before AI analysis.
- Integrated an LLM through OpenRouter to analyze job postings and extract structured information.
- Built SQLite-based persistence for storing and managing processed job data.
- Designed the application as a modular Python pipeline combining web data collection, filtering, AI analysis, and structured storage.

RanMac — Linux MAC Address Randomization Tool

Python, Linux, Networking, Bash

GitHub Repository

- Built a Python utility for dynamically randomizing MAC addresses on Linux network interfaces.
- Automated network-interface management using Linux networking commands.
- Supported both Ethernet and Wi-Fi interfaces.
- Applied Linux system scripting and networking concepts to automate low-level network configuration.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL, C, Bash

AI / ML / NLP: Machine Learning, Natural Language Processing, Sentence Transformers, **all-MiniLM-L6-v2**, Semantic Embeddings, Vector Similarity, LLMs, Generative AI, Prompt Engineering

Python / Data: NumPy, pandas

Software & Web: REST APIs, HTTP Server, Client-Server Architecture, Chrome Extensions, HTML/CSS

Databases: SQLite, MySQL, MongoDB

Systems & Tools: Linux, Git, GitHub

Android: Kotlin, Android, Jetpack Compose, CameraX

CERTIFICATIONS & LEARNING

- **AWS Educate: Cloud 101**
- **AWS Educate: Machine Learning**
- **Android App Development using Generative AI**, MindMatrix
- **Innovation, Design and Entrepreneurship (IDE) Bootcamp**, Certificate of Completion

ACHIEVEMENTS

- **Infosys-PALS Hackathon 2025**, Round 2 Participant
- Certificate of participation/achievement for reaching Round 2 of the competition
